

# Neighborhood Selection Process

## How to get Swim Warriors in your neighborhood!

- 1. Location:** Swim Warriors does not guarantee travel to any neighborhood every year. However, neighborhoods located in our main areas of travel have the highest chances.
  - Our range for travel depends on our seasonal team, which is why it can differ year to year. Main areas of travel: Cumming, Dawsonville, Dahlonega, Alpharetta (limited), Gainesville (limited)
- 2. Travel Minimum:** Swim Warriors does not consider travel to neighborhood locations that have less than four swimmers. We build neighborhood schedules in the order of which locations have the most swimmers.
  - Office staff needs to have the ability to stack neighborhood lessons back to back. If a neighborhood meets the two hour (four swimmer) minimum but their availability does not align, Swim Warriors will not be able to travel there. Please keep this in mind when recruiting others in your neighborhood to sign up with us. You might want coordinate availability before filling out the registration form! This will heighten the chances for travel to your location.
- 3. Availability:** The availability listed on the form is super important! We rely on this heavily when selecting neighborhoods and building the schedules.
  - If the availability listed is not accurate, or if we are unable to stack lessons with others, we may not be able to offer a schedule for your swimmer. When in doubt, please list your maximum availability on the form to give your family the best chances! Neighborhood schedules are often built prior to sending out the dates and times to clients, which is why the availability listed is so important. If the entire neighborhood is built and then you turn down the schedule because your availability changed or was not accurate, we may not be able to offer an alternate schedule.

*Heighten your chances & help  
the scheduling process go smoothly.*

## How can you help?

- Be aware of how many others plan to sign up in your neighborhood before registration opens! We have a flyer that can be posted to neighborhood Facebook pages (if allowed by your HOA), to try and gain more interest. This flyer can be found on our website, or it can be texted to you via our swim texting line if desired.
- Know what order the residents in your neighborhood would like their to have their lessons? List that in the extra information section on the form! This will help scheduling go more smoothly and avoid schedules having to be re-worked.
- Do not select days or time frames on the form that won't work for you. If you select the 2:00-4:00pm timeframe but can't take a lesson until 3:00pm, that needs to be specified on the form. Clients that select the 7:00-8:00pm timeframe could possibly be offered lesson start times as late as 7:30pm.
- Be sure to select your **MAXIMUM** availability on the form. Even if your neighborhood talked about certain days to coordinate availability, you can still select extra options. Its always helpful for our scheduling coordinations to know your exact individual availability!
- Be aware of your neighborhood pool hours of availability. Particularly in neighborhoods with a swim team as the hours for swim lessons will have to occur after swim team practices. Not knowing the availability for your neighborhood pool can cause significant scheduling delays.
